pending

Instructed by Sherman Canapp, DVM, MS, CCRT, DACVS, DACVSMR
& Debra Canapp, DVM, CCRT, CVA, DACVSMR

SUMMARY

Expand upon your current skill set in arthroscopy/needle scoping with this one day advanced technique course focusing on common conditions in the canine elbow and shoulder.

This course is designed for participants who have already completed an introductory arthroscopy or needle scope course. Participants must be comfortable in their ability to perform basic diagnostic scopes. Online webinars will act as a refresher of these common conditions and the tools needed to diagnose and treat them. During the wet lab, participants will have access to power equipment and various arthroscopy tools needed to properly treat these conditions. Companion Animal Health and CONMED representatives will be on site to assist and provide more details regarding their equipment and educational programming.

September 20, 2019
9 AM - 5 PM

CONMED Learning Center
11311 Concept Blvd, Largo, FL 33773

Registration Fee, \$1,700
