or email acarter@vosm.com

Registration Fee
Veterinarians: \$1,700
Residents: \$800

Open to general practitioners, surgeons, and residents. Technicians may attend at no cost with accompanying veterinarian.

Incorporate arthroscopic treatments into your practice with this one day course focused on common conditions in the canine elbow and shoulder.

Online webinars will be sent to participants ahead of the course to aid instruction during the wet lab. During the wet lab, participants will have access to power equipment and various arthroscopy tools newly incorporated into the veterinary space from a top of the line human orthopedic manufacturer, CONMED.

Learn how to treat the following conditions:

ELBOW

- Fragmented Medial Coronoid Process (FCP)
- Osteochondritis Dissecans (OCD)
- Jump Down Syndrome
- Chronic Osteoarthritis

SHOULDER

- Medial Shoulder Syndrome (MSS)
- Osteochondritis Dissecans (OCD)
- Biceps Treatment
